Call to order: **(877) 478-1911**

COMPACT AND DISCREET WITH 360° SURVEILLANCE for bus and rail applications.

Mobotix Q24 camera offers 360° surveillance for simultaneous viewing of four different angles

Power over Ethernet for easy installation and integration with bus and rail applications

High-resolution 3.1 megapixel imaging increases driver and passenger safety, prevents theft and deters violence

IP67 rated housing for vandal proof and harsh weather resistant protection

Your Mobotix Bus & Rail Surveillance System Includes:

- MOBOTIX Q24M 360° NETWORK CAMERA
- MicroSD CARD
- DC/DC PoE INJECTOR
- 12V WIRELESS DEVICE (Optional)

Powered by the sleek and compact Mobotix Q24 360° network camera, the Mobotix Bus & Rail Surveillance System offers a comprehensive solution designed for mobile surveillance. With an impressive 360° all around view, the Mobotix Q24 IP camera makes it easy to capture the entire scene with one camera. A panorama function and quad view shows images from four different angles simultaneously.

The mobile system comes equipped with long-term storage on a MicroSD card. The MicroSD card eliminates the need for a PC or DVR for recording. All images are processed within the camera itself, helping to optimize network bandwidth and reduce system costs. The Mobotix Q24 IP camera comes with built-in 2-way VOIP audio and is supported by Power over Ethernet (PoE), ideal for mobile applications because it only requires a single network cable for full event-driven recording with audio and video.
