

Vivotek Mobile Surveillance System

Call to order: **(877) 478-1911**

ROBUST AND HIGH-QUALITY SURVEILLANCE for buses, trains, taxi cabs, subways and more.

2-megapixel resolution with the Vivotek MD7560

Supports Power over Ethernet for easy installation with mobile surveillance solutions

IP67 rated housing for vandal proof and harsh weather resistant protection

Your Vivotek Mobile Surveillance System Includes:

- VIVOTEK MD7560 FIXED DOME CAMERA
- MicroSD CARD
- DC/DC PoE INJECTOR
- 12V WIRELESS DEVICE (Optional)

Designed for mobile applications, the Vivotek Mobile Surveillance System is built around the Vivotek MD7560 fixed dome network camera. The MD7560 features 2-megapixel resolution for detailed imaging that makes it easy to accurately identify faces and other crucial details. With IP67 rated housing, the rugged Vivotek MD7560 is built to withstand tampering and harsh weather conditions on many forms of transportation including buses, trains, taxi cabs, and subways.

The MD7560 is supported by Power over Ethernet (PoE), eliminating the need for a nearby power outlet, an important consideration for mobile surveillance applications. A single Ethernet cable supplies power and relays data to and from the camera. An included MicroSD card eliminates the need for a PC or DVR for recording. The card offers long-term storage and all images are processed within the camera itself, which helps optimize network bandwidth and reduces system costs.
